

Invisy Privacy Policy

You have legitimate concerns regarding your privacy; and therefore, we clearly outline how we process and collect your personal data. We want you to understand what limited information we collect and what may happen to that information when you use any of the Invisy VPN Services.

This document (hereinafter - the "Privacy Policy") explains the privacy rules applicable to all information collected or submitted when you access, install, or use the Invisy VPN Services.

Our top priority is customer data security. Operating under the jurisdiction of the United States (US) allows us to guarantee our no logs policy.

Our VPN servers do not require any pre-registration so there is no information stored about our customers.

The payment processing system is done exclusively by Apple, and only Apple has access to the customer information.

The Apple SDK only sends us a response that you paid for a subscription and that is it. We start providing the service to you, without acquiring any personal information about you.

We will continue providing this service and assure you, our customer that we will never collect or store any personal information about the people who are using our VPN service.

Customer service information. Invisy VPN stores inquiries and communications with users through the Contact Us and Community Area pages for not more than 6 months.

Please contact us by email at support@cyberintellsolution.com if you have any questions regarding our Privacy Policy or you would like to enforce your rights related to privacy.
